Test Equipment, Tools, & Service Accessories

Overview of Products Provided

BC Group distributes a complete assortment of test equipment and tools for professionals involved in maintenance of heating, air conditioning, and refrigeration systems.

Our line-up includes more than 50 brands of general-purpose and special-purpose test equipment, plus tools and a broad variety of service accessories.

We can outfit one technician or an entire field service organization. Choose from over-the-counter tool kits, or we can custom-design an assortment of equipment and tools to your unique specifications – including the cases you'll use to store and transport them.

We maintain an NIST-traceable calibration and repair facility, and we offer quick, cost-effective service both on items we sell and on test equipment you've acquired elsewhere.

In short, we are a "one-stop shopping" resource for your organization's test equipment and tool requirements.
